Company AJOB has been a successful Czech personnel and information agency since 1999. We assist people who want to work abroad. Within the 5 years of our existence we have grown into a flexible team of professionals. Due to our experience with national and foreign market job positions we provide safety, background and stability to all our partners.

We are the only

**server which
is oriented
exclusively for
working abroad.**

We are able to react quickly to the needs of our foreign partners.

The internet portal AJOB.cz was established according to the demands of a server which would exclusively cover the market of job opportunities abroad and which would provide a sufficient amount of useful information and legal positions for its applicants. It means, mainly, the positions for students and young people (seasonal work, au-pair etc.)

Our latest idea is the combination of personnel agency and internet portal.
